

March 11, 2011

Dear customers:

I would like to report about damage situation due to the earthquake occurred at the coast of Sanriku and the offing of Ibaraki Prefecture at 14:46 and 15:15 today.

Neither manufacturing sites nor business offices in a district concerned were suffered serious damages. However, production is now being suspended temporarily due to the power failure of whole suffered area. It is planning to restart the production as soon as the electric power is restored and security verification is executed.

Any customers who will be affected by the earthquake will be informed by person in charge promptly.

I appreciate your kind understanding and cooperation.

Sincerely,

Takehiro Kamigama
