Options (Add Suffix to Part Number) - See Page 40 for full description

- 012 EZ Mount
- 022 24 VAC Control
- 040 Faston Input Terminals

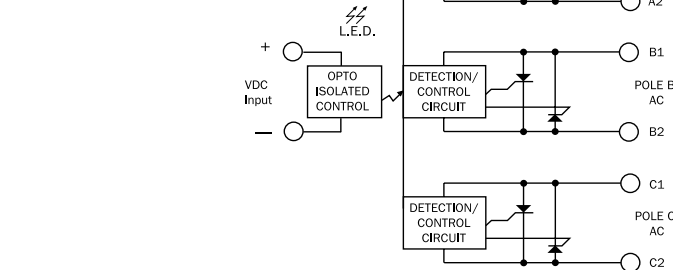

Part Number Example: EF RTP1600660D150

MECHANICAL SPECIFICATION

See page 42 for mounting information.

BLOCK DIAGRAM

FEATURES/BENEFITS

- High temperature plastic housing for mechanical ruggedness.
- Control status LED is standard.
- SCR outputs for high dv/dt, current and voltage capability.
- Choice of AC or DC inputs.
- Constant Current Input minimizes source current requirement (standard on **D** and **A** inputs only)
- Exposed ceramic baseplate for reduced thermal resistance and best thermal performance.
- Constructed using Teledyne's unique Fused Copper™ process. This process yields superior thermal impedance and power cycling capabilities through reduced thermal interconnections, allowing for cooler, more reliable operation.
- The logic drive circuitry section uses the latest in reliable surface mount technology.
- Certifications:
 - UL and ULC Recognized File #E128555
 - CE # EN60947-1

TYPICAL APPLICATIONS

- On/Off control of high power AC equipment.
- Interfacing of microprocessor controls to AC loads - lights, motors, heaters, valves, solenoids etc.
- Electromechanical line relay replacement.
- Mercury displacement relay replacement.
- Industrial and Process Controls.
- Programmable Controller interface.
- Robotics motor position and speed controls.

GENERAL DESCRIPTION

The EF RTP series three phase AC Solid State Relays are designed to provide control of high amounts of power in three phase applications. Optical isolation ensures complete protection of the relays control elements from load transients in the load circuits. Teledyne's advanced design featuring the Fused Copper™ process offers users superior thermal management resulting in excellent performance, quality and reliability.

ELECTRICAL SPECIFICATIONS

NOTES:

- 1.) Where overvoltage transient spikes are present, suppression may be required. A suppressor and/or a snubber circuit across the AC terminals of the module will provide additional transient immunity.
- 2.) For 400 Hz inductive load, contact factory.
- 3.) All parameters at 25°C unless otherwise specified
