

**Broadband IF Driver Amplifier  
50 - 2500 MHz**

**MAAMSS0046  
V2**

**Features**

- Broadband Operation
- Output Intercept Point: +38.5 dBm @ 250 MHz
- Output P1dB: +19 dBm
- High Efficiency
- 50  $\Omega$  Input/Output Match
- Gain: 18 dB @ 250 MHz
- Lead-Free SOT-89 Package
- 100% Matte Tin Plating over Copper
- Halogen-Free "Green" Mold Compound
- 260°C Reflow Compatible
- RoHS\* Compliant Version of MAAMSS0017

**Description**

M/A-COM's MAAMSS0046 driver amplifier is a GaAs MMIC which exhibits high OIP3 as well as high gain and low power consumption in a lead-free SOT-89 surface mount plastic package.

The MAAMSS0046 employs a monolithic single stage design featuring a convenient 50  $\Omega$  input / output impedance that minimizes the number of external components required. The device runs off a single +5 volt supply and draws 70 mA typically.

The MAAMSS0046 is fabricated using M/A-COM's iHBT process to realize low current and high power functionality. The process features full passivation for increased performance and reliability.

**Ordering Information <sup>1</sup>**

Part Number	Package
MAAMSS0046TR-3000	3000 piece reel
MAAMSS0046SMB	Sample Board (Includes 5 Samples)

1. Reference Application Note M513 for reel size information.

**Maximum Operating Conditions <sup>2</sup>**

Parameter	Maximum Operating Conditions
Junction Temperature	125°C
RF Input Power	14 dBm

2. Operating at or within these conditions will ensure MTTF > 1 x 10<sup>6</sup> hours.

**Functional Schematic**

**Pin Configuration**

Pin No.	Function	Pin No.	Function
1	RF Input	3	RF Output/Bias
2	Ground		

**Absolute Maximum Ratings <sup>3,4</sup>**

Parameter	Absolute Maximum
RF Input Power <sup>5</sup>	15 dBm
Voltage	6 Volts
Junction Temperature <sup>6</sup>	+150°C
Operating Temperature	-40 °C to +85 °C
Storage Temperature	-65 °C to +150 °C

3. Exceeding any one or combination of these limits may cause permanent damage to this device.

4. M/A-COM does not recommend sustained operation near these survivability limits.

5. The MAAMSS0046 is designed to operate optimally at 10 dB backed off from its output P1dB. Driving the device at higher power levels could degrade performance.

6. Thermal Resistance = 110°C/W.

\* Restrictions on Hazardous Substances, European Union Directive 2002/95/EC.

**Operating the MAAMSS0046**

The MAAMSS0046 can be damaged by electrostatic discharge (ESD). Use proper ESD control techniques when handling this device. To operate the MAAMSS0046, follow these steps.

1. Apply  $V_{CC}$  (5.0 V).
2. Set  $P_{IN}$ .
3. Turn off in reverse order.
